PRÓLOGO

"

Há o entendimento de que uma simples substituição de vocábulos constitui uma paráfrase. Este seria o grau mais próximo de zero. [...] O pesquisador, o estudante, o redator de trabalhos acadêmicos evitarão esse tipo de paráfrase, particularmente por contribuir muito pouco para o esclarecimento das ideias apresentadas. Nesses termos, a paráfrase revela-se um *pasticho*. (MEDEIROS, 2009, p. 169-170, grifo do autor).

= PLÁGIO

Parafrasear é INTERPRETAR, escrever com suas palavras.
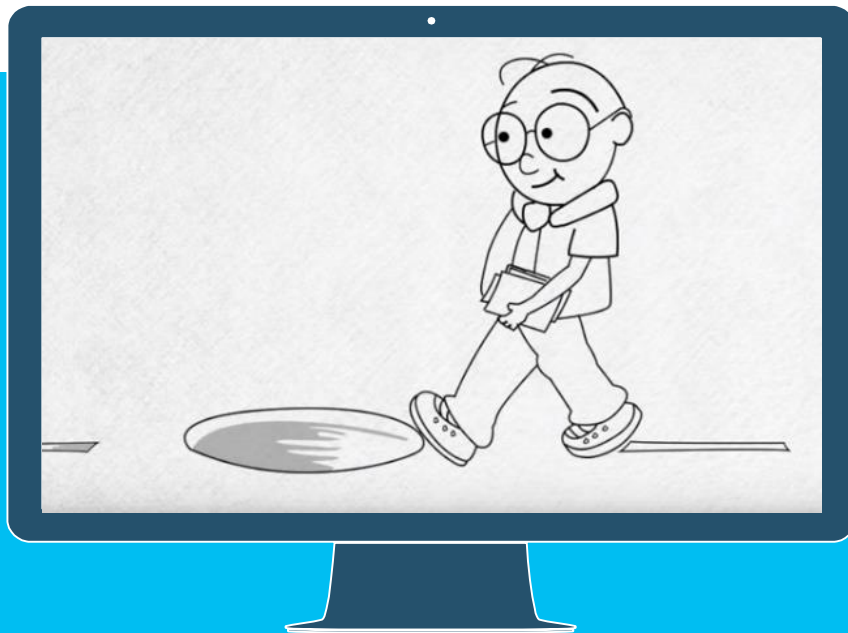

A PARÁFRASE DE GRAU ZERO É UMA **TRAIÇÃO** AO **LEITOR**.

A Natural Setting: A History of Exploration and Settlement in Yosemite Valley

Since its first discovery by non-indigenous people in the mid-nineteenth century, Yosemite Valley has held a special, even religious, hold on the American conscience because its beauty makes it an incomparable valley and one of the grandest of all special temples of Nature. While Yosemite holds a special grip on the western mind, perceptions about the Valley have evolved over time due to changing politics, migration patterns and environmental concerns as man has become more attuned to his relationship and impact on nature.

An Untouched View A History of Settlement and Change in Yosemite Valley

The first non-natives to see Yosemite Valley were probably members of the mid-nineteenth century Joseph Walker Party, who crossed the Sierra Nevada from East to West. The first descriptions of Yosemite came almost 20 years later. From the start, the valley has been renowned for its natural beauty, and highly regarded as he center-piece of Yosemite National Park, attracting visitors from around the world. While Yosemite holds a special grip on the western mind, perceptions about the Valley have evolved over time due to changing politics, migration patterns and environmental concerns as man has become more attuned to their relationship and impact on nature.

O FANTASMA DO PLÁGIO

Plágio causa retratação de artigo de padre

Ética

O artigo "A estrada para Emaús e a estrada para Gaza", publicado em 1994 pelo padre canadense Thomas Rosica, de 60 anos, foi retratado pela revista *Worship*, um periódico acadêmico revisado por pares especializado em estudos sobre liturgia. Isso porque o religioso copiou trechos de seis diferentes teólogos no artigo, sem mencionar a fonte. Não foi um caso isolado. O professor de filosofia da Universidade Dominicana de Ohio Michael Dougherty analisou 30 anos de produção literária de Rosica e o acusou de plagiar trabalhos de teólogos, jornalistas e até cardeais em dezenas de palestras que proferiu e colunas publicadas na imprensa. "Nosso escrutínio mostrou que o plágio era um hábito duradouro e consistente", escreveu Dougherty no jornal canadense *National Post*. O padre trabalhava no serviço em língua inglesa do Escritório de Imprensa do Vaticano e comandava uma emissora católica de televisão no Canadá. Ele admitiu as falhas éticas, interrompeu sua produção de textos de divulgação e renunciou ao posto de conselheiro de uma instituição de ensino superior confessional ligada à Universidade de Toronto, o University of St. Michael's College. "Não quero que meus erros turvem a governança da universidade e ofereçam um mau exemplo para estudantes, educadores e funcionários", explicou o religioso em uma nota. "Todos sabemos que plagiar é errado. Minhas ações nunca foram deliberadas, mas estavam erradas."

SCIgen - An Automatic CS Paper Generator

About **Generate** **Examples** **Talks** **Code** **Donations** **Related** **People** **Blog**

About

SCIgen is a program that generates random Computer Science research papers, including graphs, figures, and citations. It uses a hand-written **context-free grammar** to form all elements of the papers. Our aim here is to maximize amusement, rather than coherence.

One useful purpose for such a program is to auto-generate submissions to conferences that you suspect might have very low submission standards. A prime example, which you may recognize from spam in your inbox, is SCI/IIIS and its dozens of co-located conferences (check out the very broad conference description on the **WMSCI 2005** website). There's also a list of **known bogus conferences**. Using SCIgen to generate submissions for conferences like this gives us pleasure to no end. In fact, one of our papers was accepted to SCI 2005! See **Examples** for more details.

We went to WMSCI 2005. Check out the **talks and video**. You can find more details in our **blog**.

Also, check out our 10th anniversary celebration project: **SCIpher**!

Deconstructing Voice-over-IP

Elisabete Werlang and Eli Lopes da Silva

Abstract

The implications of ambimorphic archetypes have been far-reaching and pervasive. After years of natural research into consistent hashing, we argue the simulation of public-private key pairs, which embodies the confirmed principles of theory. Such a hypothesis might seem perverse but is derived from known results. Our focus in this paper is not on whether the well-known knowledge-based algorithm for the emulation of checksums by Herbert Simon runs in $\Theta(n)$ time, but rather on exploring a semantic tool for harnessing telephony (Swale).

1 Introduction

Real-time technology and access points have garnered great interest from both leading analysts and security experts in the last several years. The notion that steganographers interact with virtual information is usually adamantly opposed. On a similar note, in fact, few security experts would disagree with the synthesis of rasterization, which embodies the unproven principles of robotics. However, 802.11b alone will not able to fulfill the need for mo-

made distributed, wearable, and mobile, but that the same is true for sensor networks. Next, our framework for harnessing interactive communication is famously bad. The practical unification of IPv6 and write-back caches is more unfortunate than ever, and Swale helps system administrators do just that.

Chemistry Papers Are Retracted Mostly Due To Plagiarism, Data Manipulation

EMAIL | FACEBOOK | LINKEDIN | TWITTER | REDDIT | PRINT

By Alex Berezow — May 28, 2019

Retractions in science are a fact of life. Sometimes, the published literature is wrong, and when it is discovered, the paper is often stricken from the scientific record.

We would like to believe that most retractions are due to honest errors, for example, accidentally mixing up control and experimental groups. We don't want to believe that most retractions are for nefarious reasons, like fraud.

Credit: Public Domain/Wikipedia

Unfortunately, new research by François-Xavier Coudert published in the journal *Chemistry of Materials* does not reveal happy data. Dr. Coudert found 331 papers in the fields of chemistry, materials science, and chemical engineering that were retracted in 2017 and 2018. The overall retraction rate (about 3 per 10,000) is low, which is good news, but disheartening.

2.5 Quanto ao espectro do plágio (TURNITING, 2016).

1 Clone   # 2 CTRL+C   # 3 – Find -   # 4 – Remix   # 5 – Recycle

6 – Hybrid   # 7 – Mashup   # 8 – 404 Error   # 9 – Aggregator   # 10 – Re-tweet

Imagem 4

Orientar sobre:

3.1 Antes da submissão

» Regras de submissão

» Aspectos éticos (plágio)

Imagem 4:https://cdn.pixabay.com/photo/2014/12/31/08/02/typewriter-584696_960_720.png

Imagem 4

3.2 Após a submissão – em resposta a plágio

» Cuidado nas palavras

» Nem sempre se sabe quando o plágio é intencional

» O mais importante é CONTRIBUIR com os autores

Imagem 4

O Committee on Publication Ethics (COPE) recomenda retratar artigos quando:

» Resultados falsificados ou fabricados em pesquisa;

» Houve publicação prévia sem referência, permissão ou justificativa;

» Por plágio;

» Relatos de pesquisa não ética.

(COPE, 2009)

Para finalizar...

3.1 PUBLICAR OU PERECER

as práticas em torno da síndrome de **publicar ou perecer** precisam ser expostas e examinadas (FARBER, 2019).
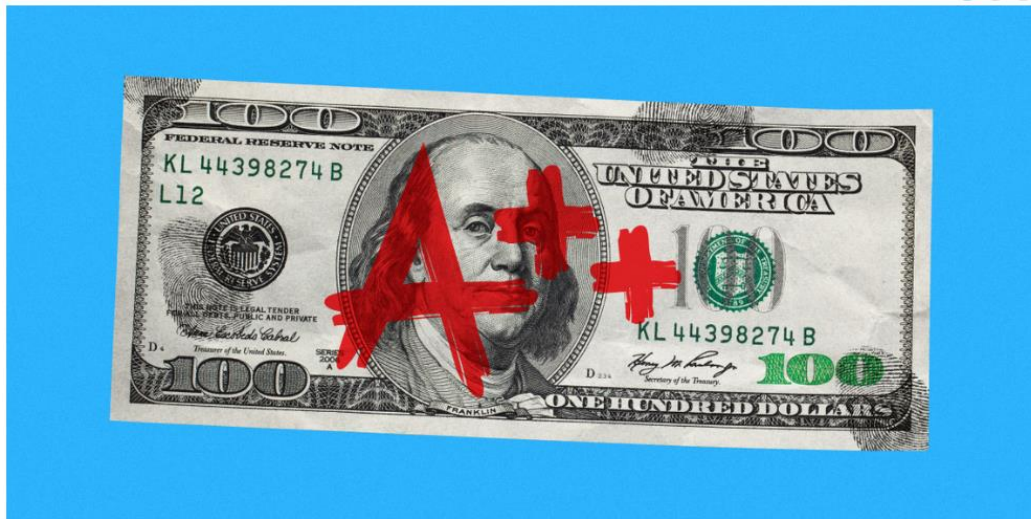

3.2 E QUANDO NÃO HÁ PLÁGIO, NEM AUTORIA?

Millions of students are buying 'plagiarism-free' essays for as little as $13 — and it's nearly impossible for teachers to prove

Hayley Peterson May 10, 2019, 1:46 PM

Millions of students are paying companies to write papers for them. Samantha Lee/Business Insider
