

# Processo de Avaliação e Critérios de Seleção de Revistas na *Web of Science* *Core Collection*

deborah.dias@clarivate.com

# Como uma revista é indexada na Web of Science, se mantém na base e tem seu Fator de Impacto

[deborah.dias@clarivate.com](mailto:deborah.dias@clarivate.com)

## Web of Science

- Web of Science™ é a base global de citações, independente de editoras, de maior credibilidade no mundo.
- Capturamos, indexamos e criamos links para todos os metadados de todos os itens na Web of Science Core Collection.
- Usamos um processo seletivo e robusto único de avaliação e curadoria, feito por editores especializados internos.
- Nossos princípios: **objetividade, seletividade e dinâmica da coleção**

# Plataforma Web of Science

**34,000+**

Journals across the platform

**92 million**

Patents for over 46 million inventions

**21,000+**

Total journals in the  
*Core Collection*

**11 million+**

# Processo de Avaliação de Periódicos e Critérios de Seleção

# Web of Science Processo de Avaliação de Periódicos e Critérios de Seleção

- Conduzido por nossa equipe interna de editores especializados.
- Não possuem afiliação a editoras ou instituições.
- Cada editor é especializado nas suas áreas específicas de conhecimento, com profunda experiência do panorama de publicação da área.
- Os dados e informações dos periódicos são coletados pelos editores independentemente, não se baseando em dados fornecidos pelas editoras.
- Não usamos algoritmos ou delegamos qualquer decisão editorial a terceiros.
- Todos os editores usam o mesmo conjunto de 24 critérios de qualidade e 4 de visibilidade para todos os periódicos.

# Web of Science Processo de Avaliação de Periódicos e Critérios de Seleção

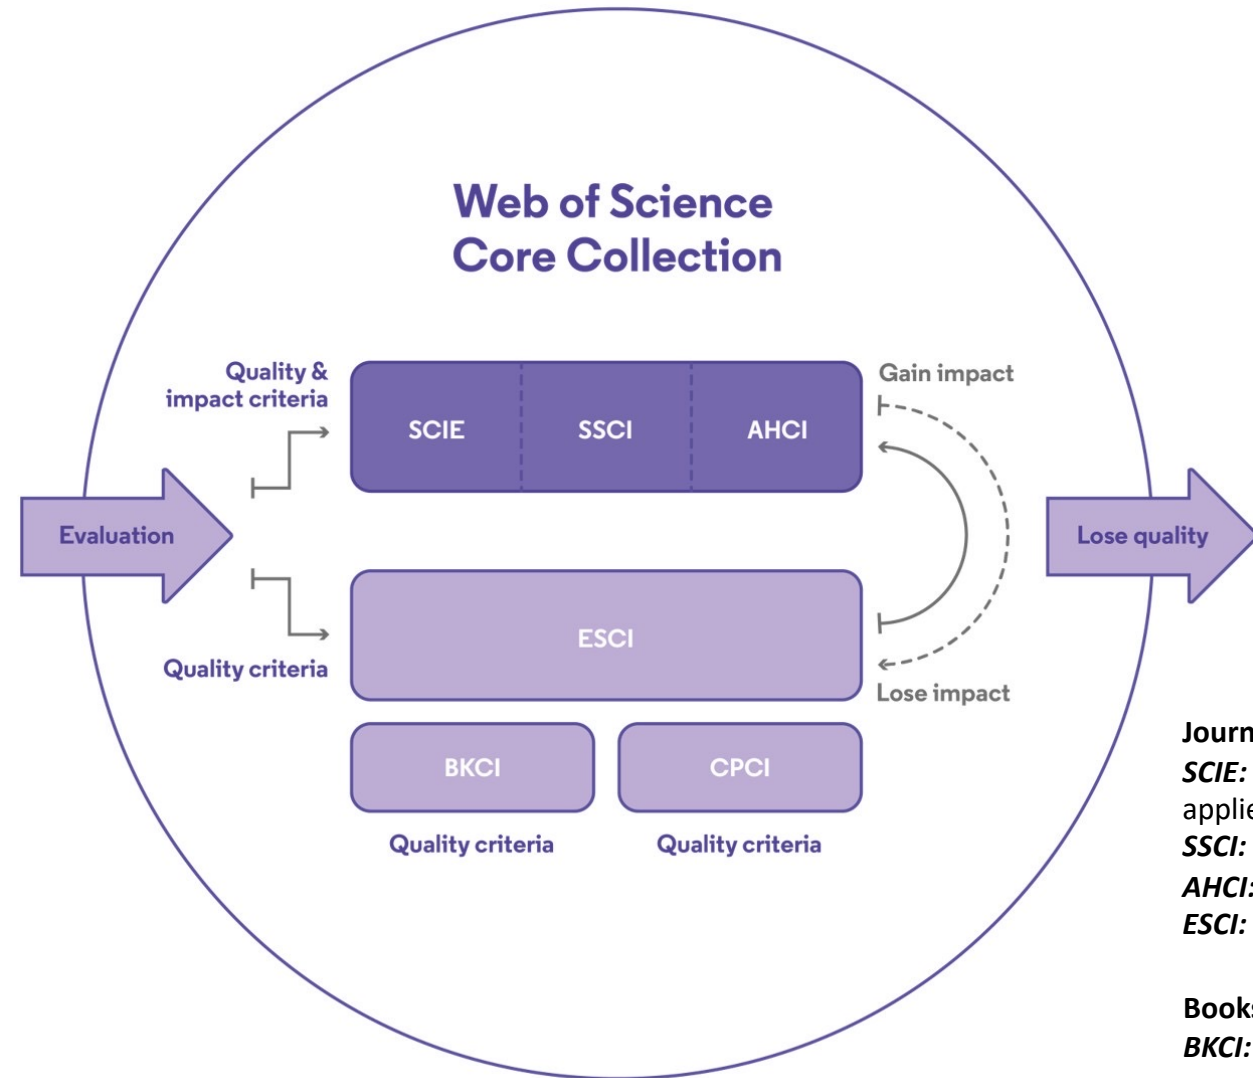

Journals que estão de acordo com os critérios de qualidade entram no ESCI

Journals que atendem todos os critérios (qualidade e visibilidade) entram em SCIE, SSCI ou AHCI

ESCI journals que ganham visibilidade vão para SCIE, SSCI ou AHCI

SCIE, SSCI e AHCI journals que diminuem visibilidade se movem para ESCI

Qualquer periódico que não atenda todos os critérios de qualidade é removido da *Web of Science Core Collection*

## Journals

**SCIE:** clinical, natural and applied sciences

**SSCI:** social sciences

**AHCI:** arts & humanities

**ESCI:** all disciplines

## Books

**BKCI:** all disciplines

## Conference Proceedings

**CPCI:** all disciplines

Editorial Evaluation (Quality)

Editorial Evaluation (Impact)

- Re-avaliações são priorizadas para aqueles periódicos que apresentam alta performance de citações.
- Nós **monitoramos** a performance das citações de todos os **periódicos indexados no ESCI** e fazemos a re-avaliação quando os indicadores mostram que o critério de visibilidade pode ser atingido.
- O processo de re-avaliação começa na etapa da Triagem Editorial. Os periódicos são **re-avaliados por Qualidade** primeiro; **Avaliação da visibilidade depende da qualidade** ter sido atingida.
- A **qualidade** das revistas é **monitorada** continuamente. Quando se detetam problemas na qualidade de uma revista indexada, ela é reavaliada com base nos nossos critérios de seleção.
- Mais informação é encontrada em nossa política de deseção e em nosso blog.

# Mudanças na edição do JCR que saiu em Junho 2023 (referente ao ano 2022)

Começando na edição de 2023 do JCR, o Fator de Impacto dos periódicos será expandido para todos os periódicos da Web of Science Core Collection, incluindo as de Artes e Humanidades.

Quase **9.000 periódicos** de mais de **3.000 editoras** terão o JIF pela primeira vez.

No mínimo, será um incremento de **5%** nos periódicos do Global South<sup>1</sup> que terão JIF.

Será um incremento de **8%** nos periódicos gold open access que terão JIF.

<sup>1</sup>According to the United Nations definition: [http://www.fc-ssc.org/en/partnership\\_program/south\\_south\\_countries](http://www.fc-ssc.org/en/partnership_program/south_south_countries)

- Expandindo o cálculo do JIF para todos os periódicos que passaram pelo nosso rigoroso conjunto de critérios de qualidade na Web of Science, é o último aperfeiçoamento para todas as publicações de qualidade incluindo-se periódicos recém lançados, open access, que publicam em temáticas de nichos ou tem foco regional, expandindo a representatividade das diferentes regiões do mundo.
- A edição de 2023 do Journal Citation Reports trará o JIF com uma única casa decimal, ao invés de 3 casas, para que a análise seja feita considerando-se os outros indicadores e os dados descritivos no JCR, quando comparando journals.

# Suporte a avaliações pelas instituições com perfis completos de todos os periódicos na Web of Science

## Aumente o impacto de seus recursos

Provendo o JIF a todos os periódicos na Web of Science Core Collection aumenta a visibilidade de suas subscrições. A partir de métricas relevantes para cada pesquisador na instituição, você pode melhor suportar os objetivos de pesquisa da sua instituição com as ferramentas disponíveis.

## Suporta os pesquisadores na decisão de onde publicar

Com mais dados e métricas à disposição, seus pesquisadores podem tomar melhores decisões sobre qual o periódico onde seria mais adequado publicar seu trabalho. Extendendo o JIF para todos os periódicos, abre opções aos pesquisadores para utilizar as métricas para decidirem onde publicar.

## Simplifica o gerenciamento das coleções

A extensão do JIF simplifica a avaliação dos periódicos por completar o perfil no JCR para todos os periódicos selecionados. Desde o começo, o JIF foi concebido para auxiliar a biblioteca a acompanhar o panorama de evolução da publicação acadêmica. Extendendo o JIF lhe fornece uma métrica adicional confiável, transparente, tornando mais fácil determinar quais revistas são altamente relevantes e utilizadas na categoria.

O JIF é uma métrica própria para revistas acadêmicas, concebida para a gestão das próprias revistas.

O JIF não reflete a performance de artigos individuais no contexto das avaliações acadêmicas.

Para mais informações, acessem [ISI](#).

A partir da edição de 2023, os fatores de impacto das revistas (*Journal Impact Factor*, JIF) são calculados para **todas as revistas da Web of Science Core Collection.**

- Em **2023**, os rankings por categoria e quartis incluem somente as revistas indexadas em **SCIE e SSCI**.
- A partir de **2024**, se incluirão as revistas em AHCI e ESCI aos rankings por categoria em JCR e também os quartis. Existirá um **único ranking para cada uma das 254 categorias** que incluirá revistas dos 4 índices (SCIE, SSCI, AHCI y ESCI).
- O **JIF** agora se apresenta com **um decimal** ao invés do formato anterior de 3 decimais.

Encontre mais informação sobre essas mudanças em **nosso [blog](#).**
